RE: Lead in Children's Products Purchased at Walmart (PHT 011, PHT 017)

Dear Mr. Abraham:

We just received a report about two children's products purchased in a Walmart store in Oakland, California, that contains illegal levels of lead. The lead levels reported exceed the limits in the federal Consumer Product Safety Improvement Act ("CPSIA"). Furthermore, selling the products without a proper warning likely violates California's Safe Drinking Water and Toxic Enforcement Act of 1986, commonly known as "Proposition 65." We are writing to ask that you stop selling the products immediately and take other corrective action as needed.

There are two products. The first product is a Kid's Poncho sold under the Walmart brand. The SKU is 12655929483. Our internal reference number is PHT 011. (Please use the internal reference number in communications with our office about this.) The second product is a pair of Faded Glory "Rebecca" shoes. The SKU is 66971137708. Both products were purchased on November 4, 2009, at a Walmart store in Oakland. We have enclosed photographs of the products.

The items were purchased by an investigator for the Center for Environmental Health, using a grant from a fund administered by the Public Health Institute. The fund was established through a Proposition 65 settlement between our office and several companies over lead in toys. (*People v. Mattel et al.*, Alameda County Super. Ct., Civ. No. RG 07-356892.) After screening the products for lead, the Center for Environmental Health sent a sample of each to a federally-approved laboratory for further testing. The test results for the poncho indicates 677 parts per million ("ppm") lead in the yellow fabric. Test results for the shoes indicate 1,331 ppm lead in the plastic sole of the shoes. These levels exceed federal lead limits, which deem a children's product with more than 300 ppm lead in an accessible component a "banned hazardous

substance.” They also appear to violate Proposition 65, which requires a clear and reasonable warning prior to exposing persons to known carcinogens and reproductive toxins, including lead. (Cal. Health & Saf. Code, § 25249.6; Cal. Code Regs., tit. 27, § 27001.)

Lead is a toxic metal that damages the nervous system and other organs. Even at low levels of exposure, lead can impact brain development in children. Based on what appears to be violations of federal and state law, you should stop selling the products immediately. Additionally, please send us any test results you have and any representations from the manufacturer or supplier about the lead content in the products. Please contact us immediately so we can discuss what further actions your company intends to take.

Sincerely,

HARRISON M. POLLAK
Deputy Attorney General
